

Use Live Speech on your iPhone, iPad, Mac, or Apple Watch

Live Speech is a helpful tool that lets you type what you want to say, and your device will speak it for you. This is perfect for individuals who have difficulty speaking, making it easier to communicate during calls, video chats, supported assistive communication apps, or from your device's speakers for in-person conversations. You can also save your favorite phrases and create a personalized voice for a more personal touch.

Create a Personal Voice on your iPhone, iPad, or Mac

With Personal Voice, you can create a synthesized voice that sounds like your own to communicate with family and friends. Use your Personal Voice to type to speak in FaceTime and phone calls, assistive communication apps, and in-person conversations.
