Geemarc V2T-10

Desciption:

With this new device, your landline phone conversations can be converted from voice to text on an android tablet. Just plug the V2T10 device to the phone cord and its base of most corded home or business phones, and then to the android tablet.

The V2T10 Converter has two modes (switch to preference):
- Voice to text conversion of the incoming part of the conversation only.
- Voice to text conversion of both parts of the conversation.

  (also works with in person conversations)

Live Transcribe Features:

➔ Font color and size selection
➔ Background color
➔ Phone/Tablet need Android 5.0 or later
➔ Save Conversations (24 hours or 3 days)

Teltex GLT Deluxe Captioning Tablet with Geemarc V2T-10

NO INTERNET connection required. The Teltex GLT Deluxe Captioning Tablet with Geemarc V2T-10 solution provides FREE captions for your calls. Using the Google Live Transcribe service, the captioning tablet captions both sides of the conversation or just the incoming part of the conversation. This captioning works similar to IP-CTS, the Internet Protocol Captioned Telephone Service: however, this device does not use any relay service, just automatic speech recognition (ASR).

Features:
- FREE captions displayed on the tablet, capturing both sides of the conversation
- Caption text size is adjustable for easy readability

System Includes:

- Deluxe Captioning Tablet, Tablet Stand, Geemarc V2T-10 adapter
- Connecting cables and power adapters
